Stability Summary

Accelerated stability was studied for 6 months at 40°C and 75% relative humidity. Chromatographic purity remained within the approved limit. No unknown impurity exceeded 0.10%. The container closure system showed no visible change.

Serial No: SN-77821

Invoice No: INV-2024-015

Storage note

Retain the sample for one year after batch release. Report any confirmed out of specification result to the Quality Assurance group before distribution.

Reviewer comments

Results are consistent with the previous three commercial batches. No retest is required.
